IC-A

The **Navigator Web App** is the mobile supplement for the tried-and-tested CompactDoc PC software. It allows easy live handling of the digital construction site for:

- site managers,
- master installers,
- laboratory technicians,
- service technicians

The people in charge are provided in real time with exactly those functions that are necessary for their work area:

- map views with switchable measurement data
- operating states of the machines deployed
- statistics on construction progress
- system status of the Navigator components
- project administration and target value settings

Browser-based Web App
for all mobile devices
(Android, iOS and Windows)
